Question 5

GH-300: Copilot Chat Commands

Which slash command in GitHub Copilot Chat is specifically designed to generate unit tests for selected code?

A. /explain

B. /fix

✔ C. /tests

D. /doc

Correct Answer: C

The `/tests` slash command prompts GitHub Copilot Chat to analyze selected functions or blocks of code and generate appropriate unit test suites matching the active testing framework.

Option Breakdown

- **A. /explain:** Used to get natural-language explanations of selected code blocks.
- **B. /fix:** Proposes solutions and fixes for identified errors or bug diagnostics in code.
- **C. /tests:** Correct. Generates unit test cases for the highlighted selection.
- **D. /doc:** Generates documentation comments (docstrings) for functions, interfaces, or classes.

💡 **GH-300 Exam Tip**
Core Slash Commands to know for the exam: `/tests` (generate unit tests), `/explain` (code explanation), `/fix` (propose bug fix), `/doc` (write documentation), and `/setupTests` (initialize test framework).
