Question 2

GH-300: Copilot Plans & Tiers

Which of the following features is uniquely available in GitHub Copilot Enterprise compared to GitHub Copilot Business?

A. Inline code completion in Visual Studio Code.

B. Centralized seat management for organization admins.

✔ **C. Knowledge Bases and Pull Request summaries on GitHub.com.**

D. Duplication detection matching public code.

Correct Answer: C

GitHub Copilot Enterprise extends AI capabilities directly into GitHub.com features, offering **Knowledge Bases**, **PR Summaries**, and direct repository chat. Inline IDE completion, policy enforcement, and seat management exist in both Business and Enterprise tiers.

Option Breakdown

- **A. Inline code completion in IDEs:** Available across all Copilot plans (Individual, Business, Enterprise).
- **B. Centralized seat management:** Available in both Business and Enterprise tiers.
- **C. Knowledge Bases & PR summaries:** Correct. Exclusive to the Enterprise tier on GitHub.com.
- **D. Duplication detection:** Available in both Business and Enterprise plans.

💡 **GH-300 Exam Tip**

A common exam focus: *Copilot Business* covers IDE completions, security filters, and org-level policies. *Copilot Enterprise* adds GitHub.com web chat, PR summaries, Knowledge Bases, and custom fine-tuning.
