Question 43

03: Understand Data & Architecture

What privacy guarantee applies to custom fine-tuned models created in GitHub Copilot Enterprise?

A. Fine-tuned model weights are published to the public GitHub Marketplace.

✔ **B. Fine-tuned models are kept strictly private to your enterprise and are never shared or used to train public GitHub models.**

C. Model training data is cached on individual developer laptops.

D. Fine-tuned models automatically disable all content exclusions.

Correct Answer: B

Custom fine-tuned models in GitHub Copilot Enterprise are isolated to your organization. The proprietary code used for fine-tuning remains private, and custom model weights are dedicated strictly to your enterprise tenant.

Option Breakdown

- **A. Published to Marketplace:** Incorrect. Enterprise fine-tuned models are private assets, never exposed publicly.
- **B. Strictly private to enterprise:** Correct. Guarantees complete tenant isolation and data privacy.
- **C. Cached on developer laptops:** Incorrect. Fine-tuning and inference occur on cloud infra, not end-user machines.
- **D. Disables content exclusions:** Incorrect. Enterprise governance and exclusion policies remain fully enforced.

💡 **GH-300 Exam Tip**

Enterprise custom models enhance domain relevance (e.g., legacy APIs or internal SDKs) without compromising code privacy or leaking proprietary syntax.
