Question 24

GH-300: IDE Productivity

In Visual Studio Code, which keyboard shortcut cycles forward through alternative inline completions provided by GitHub Copilot on Windows?

✔ A. Alt +]

B. Ctrl + Enter

C. Tab

D. Alt + \

Correct Answer: A

When Copilot generates multiple inline completion choices, pressing **Alt +]** (Option +] on macOS) cycles to the next completion suggestion. Pressing **Alt + [** cycles backward.

Option Breakdown

- **A. Alt +]:** Correct. Cycles to the next inline code completion option.
- **B. Ctrl + Enter:** Opens the GitHub Copilot synthesis panel showing up to 10 completion suggestions in a separate tab.
- **C. Tab:** Accepts the currently visible ghost-text completion.
- **D. Alt + \:** Manually triggers an inline completion request at the current cursor position.

💡 **GH-300 Exam Tip**

Key shortcuts to memorize for VS Code on Windows/macOS:
• **Tab**: Accept completion
• **Esc**: Dismiss completion
• **Alt +] / Option +]**: Next suggestion
• **Ctrl + Enter / Cmd + Enter**: Open completions panel (up to 10)
